## 2025 Pool Opening Form

**\*\*\* ATTENTION \*\*\***

**Please review form carefully, fill out completely and return.**

### **Pool Opening Includes:**

- \* Removing all winterizing equipment, plugs and gizmos. If the water level is below skimmer, gizmo (plastic tube that plugs the skimmer) will be left in skimmer. Once water is up to the skimmer, remove gizmo and open skimmer line at equipment pad.
- \* Starting up pump and filter. *Note: Make sure electric is turned on to pump*
- \* Inspecting pool equipment: pump, filter, visible plumbing, and heater. We will give an estimate if major repairs are needed.
- \* Seal leaks at equipment pad with silicone lubricant and/or Teflon tape. If a leak requires a new gasket or oring, the part/parts will be added to the opening bill.
- \* Remove safety or waterbag cover, folding cover and setting off deck.
- \* Lighting of heater pilot light. Start heater/heat pump. Test fire gas heater. **The heater will not be left running.**

### **Important Things to Remember:**

- Leave all opening equipment and accessories (baskets, drain caps, return eyeballs etc.) easily visible from pool and within 10 feet of pool edge.
- We recommend circulating water 24-48 hours before testing water. For a free analysis, bring a water sample into the store (1 pint of water recommended) for the most accurate recommendations.
- Water and debris (leaves, sticks, etc.) **MUST** be removed from cover. **If excess water is present on safety/auto cover and technicians can't remove/open cover, pool opening will be rescheduled and will incur a return trip fee plus labor.**
- **Cover Cleanings and Vacuuming WILL NOT be available at time of opening.** If you would like a cover cleaning or vacuum, please schedule with the service department.
- Technicians will **not** add water to the pool. If water level is low, add water through skimmer prior to opening. Water below the skimmer will not allow technicians to properly open the skimmer line.
- **Removal of safety cover springs will incur a \$100 upcharge.** (We do not recommend removing springs)
- Please ensure that electricity is turned on to pool equipment. If the power is not turned on we will reschedule your opening and there will be a return trip fee.
- If service/repairs can be repaired at opening will be charged for additional parts and labor. If not, a service call will be scheduled to return with a return trip free plus parts and labor.
- Additional services can be included at opening (sand change, pump/filter installation, UV bulb replacement, i.e.) but are limited due to set scheduled amount of openings. If unable to be included we can schedule prior to or after opening is completed. For more questions, please reach out to service department.
- **NOTE: Additional leaks may occur hours after the pool is opened once the filter becomes pressurized. This can be a common occurrence. Leaks appearing days after opening of pool are subject to a new service call with additional parts and labor.**

**\*\*\* Due to amount of openings scheduled, a specific timeframe cannot be given or guaranteed \*\*\***

**OPENING DATE:** \_\_\_\_\_ **(Please call/email to set-up opening date)**
